XPIENT Announces that Denny's Purchases POS Solution for Corporate Restaurants

Charlotte, NC (July 28, 2005) ~ XPIENT Solutions LLC has announced that Denny's Inc., America's leading family restaurant chain, has purchased xpient's IRIS Point of Sale (POS) system for all of its company-owned restaurants. The selection was announced after an extensive evaluation process including an in-restaurant pilot test. Denny's will also recommend IRIS to its over 1,000 franchised restaurants.

"XPIENT's IRIS POS application provides a set of core features that mirrors our business requirements with capabilities that will allow us to enhance and grow the application for future business initiatives," said Sean Dugan, Director of Restaurant Systems Infrastructure for Denny's. "Most important, the IRIS system will enable our employees to focus on overall guest satisfaction and improve business efficiencies within our restaurants."

"While IRIS has long been a leader in the quick service and fast casual restaurant markets, Denny's selection represents a breakthrough in that it positions IRIS as a leader in the family dining category as well," said Christopher Sebes, Chief Executive Officer of xpient. "We want to thank Denny's for this wonderful endorsement of our product and our people and look forward to working with them for many years."

Denny's is purchasing four xpient products, IRIS POS, Exception Based Monitoring System (XBMS) including both Visual Dashboard and Real-Time Alerts, and Enterprise Data Manager (EDM). IRIS allows users to create and maintain menus, handles complex discount scenarios, traces cash from point of order to point of deposit, tracks time and attendance, and provides automatic end of day processing. Visual Dashboard provides an interactive source of management information on the store from the back office or a terminal. Real-Time Alerts provides immediate notification via cell phone, pager or email of a wide range of business conditions, drawing advance attention to potential problems and opportunities. EDM allows users to make a single change to a central database and update all remote locations automatically for new inventory items, pricing changes, specials, employee information, tax tables, etc.

About XPIENT Solutions

XPIENT Solutions (www.xpient.com) is a leading provider of innovative, results-driven food service technology solutions, including POS, back-office and enterprise management. XPIENT offers a full complement of integrated technologies designed with success in mind.
